Information

The Silenceair vertical exterior storm louvre is designed to be used when the Silenceair acoustic ventilator is installed in a horizontal orientation, for example, over a door head.

The louvre unit consists of 2 separate storm louvre systems and an integrated insect screen.

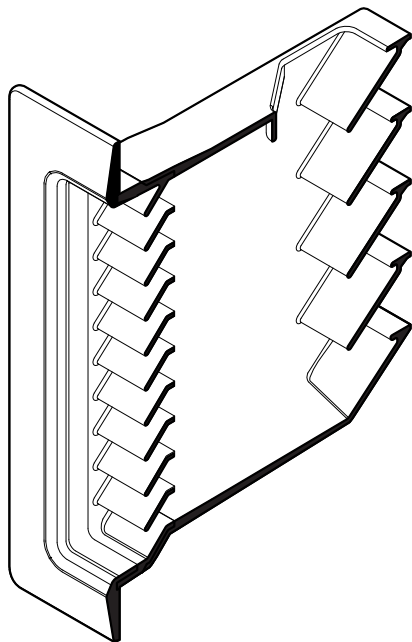

It designed so that any water that may collect in the unit will simply drain out.

The body of the unit is black, whilst the snap fit cover plate can be painted to match the colour scheme of the building.

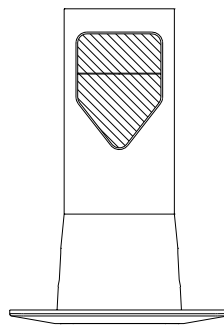

The basic unit is designed for installation in a CFC walling system. For thicker materials, such as Hebel panel. A version of the product with a longer body is available.

Product Code

- 23-01-01: Natural Black
- 23-01-03: White
- 23-01-50CC: Custom Colour
