1

2

- Locate the Silenceair unit on the inside face of the Gyprock in the desired fixing location. The Silenceair unit has clear instructions written on it for the correct orientation of the unit.
- Mark the position of the vent opening on the Gyprock to line up with the vent opening on the Silenceair unit.

- Screw fix the Silenceair unit into position through the 90mm stud or directly onto the Gyprock. The unit is robust and can be screwed or glued into position without affecting the performance of the unit.

3

4

- Mark the location of the interior vent opening onto the Gyprock.
- Fix the interior Gyprock into position.
- Cut a 140mm \* 35mm high hole in the plasterboard. Ensure the cut-out in the plaster board lines up with the interior opening in the Silenceair unit.
- Fix the interior adjustable louvre into place on the Gyprock after the wall has been painted.

- The Silenceair unit is completely hidden in the wall.
- Only the face plate of the interior adjustable louvre is visible.
